

What is meant by stored procedure?

Query: Create Stored Procedure by storing entire table in an object

create database Examples

use Examples

--drop database Examples

--drop table Sales

Create table Sales(Item varchar (15),Quantity integer, Price integer)

---- INSERT VALUES INTO TABLE

insert into Sales values('Apple',300,15)

insert into Sales values( 'Banana',400,18)

insert into Sales values('Orange',400,17)

insert into Sales values('Grapes',500,16)

insert into Sales values('Papaya',400,17)

insert into Sales values('Lemon',350,22)

insert into Sales values('Mango',487,15)

--Select \* from Sales  
--DROP PROCEDURE Sp\_Sales  
--Create Stored Procedure  
use Examples  
Go  
Create Procedure Sp\_Sales  
as  
Select \* from Sales  
--Use stored Procedure  
EXEC Sp\_Sales

### Q:Store Entire table in a Object

Table = Sales		
Item	Quantity	Price
Apple	300	15
Lemon	400	18
Apple	399	17
Grapes	500	16
Papaya	400	17
Lemon	345	22
Mango	487	15

Sp_Sales		
Item	Quantity	Price
Apple	300	15
Lemon	400	18
Apple	399	17
Grapes	500	16
Papaya	400	17
Lemon	345	22
Mango	487	15

--Create Stored Procedure  
use Examples  
Go  
Create Procedure Sp\_Sales  
as  
Select \* from Sales  
--Use stored Procedure  
EXEC Sp\_Sales
